Suluh Sulistiawan

Full Stack Developer

Started studying the programming world since 2015 until now. Interested in developing applications, especially for websites and bot automation. In addition, I often configure Linux servers. Not good enough in graphic design, but at least I understand what kind of design is suitable for the user's eyes.

EDUCATION

Junior High School
SMPN 2 Pemalang
2015 - 2018

Computer and Network Engineering
SMKN 1 Pemalang
2018 - 2021

PERSONAL PROJECTS

eLibrary (05/2019 - 06/2019)
- Desktop-based applications that use Java NetBeans as the basis, are designed flat and modern, pleasing to the eye and not decorated by any windows frame.

COVID-19 Self Test (07/2020)
- Static website pages for covid-19 virus self-test which are basically only built using JavaScript, HTMLL, and CSS.

KODEPOS (09/2020)
- Indonesian Postal Code Search API Based on Place, Village or City Name.

SMTP API (10/2020)
- Private SMTP API using NodeJS and Nodemailer module.

CrushBot (10/2020 - 01/2021)
- CrushBot is an anonymous one-on-one chat inspired by the Anonymous Chat Bot on Telegram, but the difference is that CrushBot is made for the WhatsApp platform.
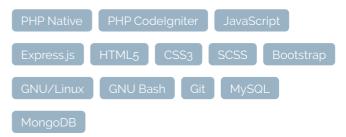

Moodle Auto Attendance (01/2021)
- Automated machines for attendance in Moodle using Puppeteer.

PDFBot (02/2021 - Present)
- PDFBot is a lightweight WhatsApp Bot to easily convert plain text and multiple images into one PDF file.

SKILLS

PHP Native   PHP CodeIgniter   JavaScript
